Safety information

Before using the product, please read the safety information thoroughly and use it properly. Alerts declared in the manual are classified to **Danger**, **Warning** and **Caution** by their criticality.

- ⚠ DANGER** Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury
- ⚠ WARNING** Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury
- ⚠ CAUTION** Indicates a potentially hazardous situation which, if not avoided, may result in minor injury or property damage

- ⚠ DANGER**
 - The input/output terminals are subject to electric shock risk. Never let the input/output terminals come in contact with your body or conductive substances.
- ⚠ WARNING**
 - Please read the safety information carefully before the use, and use the product correctly.
 - If there is a possibility that a malfunction or abnormality of this product may lead to a serious accident, install an appropriate protection circuit on the outside and plan to prevent accidents.
 - Please supply the rated power voltage, in order to prevent product breakdowns or malfunctions.
 - To prevent electric shocks and malfunctions, do not supply power until the wiring is completed.
 - Please disassemble the product after turning OFF the power.
 - Any use of the product other than those specified by the manufacturer may result in personal injury or property damage.
 - Please use this product after installing it to a panel, because there is a risk of electric shock.
 - 4 - 32 V d.c model signal inputs must be supplied with an isolated and limited voltage/current or Class2, SELV power supply.
 - Short circuit rated current is 3kA.
- ⚠ CAUTION**
 - Please make sure that the product specifications are the same as you ordered.
 - Please use the product in places where corrosive gases (especially harmful gases, ammonia, etc.) and flammable gases are not generated.
 - Please use the product in places without liquids, oils, chemicals, steam, dust, salt, iron, etc. (pollution degree 1 or 2).
 - Please avoid places where large inductive interference, static electricity, magnetic noise are generated.
 - Please avoid places with heat accumulation caused by direct sunlight, radiant heat, etc.
 - When water enters, short circuit or fire may occur, so please inspect the product carefully.
 - Do not connect anything to the unused terminals.
 - For DC types, please wire correctly, after checking the polarity of the terminals.
 - When disposing of the product, treat it as industrial waste.
 - Pay attention to the edge of the heat sink, which may be sharp.
 - The temperature of the main body and the heat sink may become extremely high when electric power is applied, which may cause burns.
 - In case of product malfunction, remove only the main body.
 - Because the SSR heats up when power is on, the lower the heat sink and ambient temperatures, the longer the life.
 - Note 1) If using a separate heat sink, use one that meets the thermal resistance table.

Suffix code

■ CE, UL certified products

Model	Code	Content
HSR-SL	□ □ □ □ □ □	Slim-type single-phase Solid State Relay
Control input voltage	D	4 - 32 V d.c.
	A	90 - 240 V a.c.
Rated load current	15	15 A
	25	25 A
	40	40 A
Operating load voltage	L	24 - 240 V a.c. (Low voltage)
	H	24 - 480 V a.c. (High voltage)
Method of operation	Z	Zero-cross switching (standard product)
	R	Random switching
Heat sink & Option	S	Integrated heat sink (standard product)
	T	Heat sink + Bimetal mounted
	N	No heat sink ※CAUTION 1) When using a separate heat sink, you must use a heat sink that meets the thermal resistance table.

Connection diagram

■ Load and input voltage wiring diagram

※ This model does not have a fuse internally. So we suggest using fast-acting fuse separately on the outside as following pictures.

Equivalent Circuit

- ※ Bimetal specification
- Operating temperature: 60°C / 80°C
- Temperature tolerance: Display temperature ±5°C
- Rating (resistive load): 3 A or less / 48 V d.c.
1 A or less / 277 V a.c.

How to install

- Please install HSR in the vertical direction.
- Otherwise, production performance may be reduced to less than 50 %.
- Since the weight of the product is heavy, install it stably when installing DIN rail.

Caution

- Since the width of the load output terminal is 10.6mm and the input terminal is 6.8mm, use a smaller terminal than the standard and tighten it with the rated torque.
- When the product is defective, separate main body and exchange it.
- Use it under temperature 25 °C when a real load current is 35 ~ 40 A.
- When 40 A maximum load is used, use 10 SQ wiring. Use clamping unit or lug when tightening it.
- Input terminal wiring
 - 1 X 0.5 mm² (1 X AWG20) or larger
 - 1 X 1.5 mm² (1 X AWG16) or less than 2 X 1.5 mm² (2 X AWG16)
- Output terminal wiring
 - 1 X 1.5mm² (1 X AWG16) or larger
 - 1 X 16 mm² (1 X AWG6) or less than 2 X 6 mm² (2 X AWG10)
- ※ Connect the wiring suitable for the load current capacity to the output terminal.

Installation intervals

- Please make intervals more than following picture.
- Please install wiring duct less than half the height of the heat sink to prevent obstruction the flow of air.
- The optimal performance of our HSR is in the ambient temperature by 25 °C so please use it lower than 25 °C
